

14 and 23 Seat Passenger Bus

The electric passenger bus is the ideal solution for transporting up to 23 people quickly and quietly with no noise and air pollutants.

The bus is ideal for theme parks, stadiums, airports and anywhere where there is a requirement to transport people effortlessly.

The high output lithium-ion battery pack and powerful direct drive motor ensures it's just as good on the hills as it is on the flat.

All the things you expect to find in passenger bus with headlights and brake lights for additional visibility and security, integrated turn indicators, horn, glass windscreen with wiper, automotive style dashboard and switch gear, power steering, servo assisted brakes.

The maintenance free lithium-ion battery pack eliminates messy top ups compared to traditional battery systems. The on-board charger and 16A plug enables the battery pack to be charged as and when you like from any 16amp socket.

- Power Steering
- Servo Assisted Brakes
- Reversing Beeper
- Seatbelts
- Optional extras: Courtesy Lighting – Heating – Wheelchair Ramp or Lift – Vinyl Wrapping

Dimensions

Height	2100mm
Length	5100mm/5750mm
Width	1750mm
Ground Clearance	250mm
Net Weight	1420kg/1790kg
Turning Radius	5.8m
Maximum Range	90miles

Specification

Battery	72v
Motor	8kW/11kw
Charger	Intelligent
Braking Distance	<5m
Controller	600A
Recharge Time	6hrs max
Max Speed	20mph

Performance

On-board Charger
PMAC Motor
Lighting Kit
4-wheel braking
Digital Battery Gauge
Seat Belts
